

Bursaries and Scholarships Policy 2024/25

Scope

This policy document applies to all College funded Bursaries and Scholarships offered by Blackburn College for all Higher Education (HE), Further Education (FE), and commercial courses. It therefore includes HE courses covered by the Access Agreement that are under the supervision of the Office for Students (OfS). This policy does not cover bursaries funded by the ESFA.

The document sets out the basis of all bursaries offered by the College, along with the associated terms and the application process. Where an appeal process is available, it is stated in each of the associated Bursary policies.

Purpose

The bursaries offered by Blackburn College are to provide support to students in line with our mission, vision and values. The over-arching purpose of the bursaries being to help students overcome financial barriers to the furthering of their education and training.

To this aim, the College may award bursaries in excess of the minimum provisions set out in this policy at its discretion and on whatever terms it wishes. This must be approved by a Senior Post-holder.

Where additional awards would benefit learners, such awards must be named, have fully specified benefits, eligibility criteria and terms & conditions and be detailed in the Schedule appended to this policy. This must be approved by a Senior Post-holder.

HE Bursaries

Bursaries available for students on a course that falls under the supervision of OfS are based upon the support set out in the Access Agreement with any changes to the Access Agreement required by OfS, or requested by the College and approved by OfS, becoming part of this policy from the date of OfS approval.

Unless a changed agreement specifically provides to the contrary, the bursaries due to a student are those set out in the Access and Participation Plan in force at the time the student start(s) his/her course.

For clarity, the use of the term 'bursary' in this document shall be taken to mean any bursary, scholarship or other award made under this policy. The titles of such awards may include any appropriate terms without taking the award outside the scope of this policy.

Publication and Communication

The College will ensure that details of bursaries available, together with the principal terms and conditions that apply to them, are available to staff, students and potential students through;

- The College website before enrolment and, where practicable, before application.
- Through communication by Student Services to students

The College will ensure that students are informed promptly after enrolment of the full details of any bursaries and/or scholarships for which they might be eligible.

Review

This policy and the bursaries offered under it will be reviewed annually alongside the College Tuition Fee Policy.

Revision of HE bursary amounts take place as necessary to comply with the terms of the College's Access and Participation Plan(s) and/or the requirements of OfS or other statutory bodies outside the annual review process.

General Terms and Conditions

Subject only to any restrictions imposed by OfS or other statutory body, any award made under this policy is subject to all/some the following general terms and conditions.

- Eligibility for any award shall cease immediately should a student withdraw from or transfer out of his/her course of study.
- Students transferring in (either from an ineligible course or other institution) to an eligible course will be entitled to the same bursaries as those students who enrolled on that course from the outset. This may be on a pro-rata basis dependent upon transfer date, details to be agreed annually by a Senior Post-holder.
- Eligibility for any award will cease if a student is no longer in 'good standing' with the College, (e.g. as a result of non-payment of fees, poor attendance, repeatedly missing submission deadlines, disciplinary action, etc.). In addition, for clarity, no bursary will be paid to a student unless payment has been received by the College for the respective proportion of their fee at the time the bursary instalment is paid. E.g. for a bursary paid in three instalments, in order for the first instalment to be paid 25% of fee must be paid, for the second instalment 50% and the final instalment 100%.
- The College will offset any debts, fines or other liabilities the student owes to it against any bursary payments due. Should a student be entitled to a bursary payment and have such an obligation to the college, only the difference will be paid.
- Payments will not ordinarily be made between scheduled payments dates unless approved by the Vice Principal - Finance and Corporate Services, or in their absence the Vice Principal – Curriculum and Quality. Extraordinary corrections resulting from changes in entitlements will be made at the next payment date.
- Any appeals against decisions made in respect of bursary payments will be reviewed by the Vice Principal - Finance and Corporate Services, or in their absence the Vice Principal – Curriculum and Quality.
